

Authorization of FY23 SLAF Project Funding January 2023

On January 20, DEQ issued its [FY23 SLAF Authorization Memo](#), which includes a list of awarded localities along with the project name and grant amount funded. This consists of approximately \$35 Million for VAMSA Member projects. DEQ's August 2022 solicitation was for \$72 Million in grant matching funds. DEQ received applications from 25 localities for 41 stormwater projects and 6 nutrient projects. After review, DEQ determined that six of the applicants were ineligible for SLAF funding, and final authorizations went to 36 stormwater projects and 5 nutrient projects totaling approximately \$37 Million, much less than the \$72 Million available.
